

1. Brainstorming & Ideation Phase

Project Name

Script-Controlled ACL – Restrict Record Access Based on Field Value

Project Idea

The project implements script-controlled Access Control Lists (ACLs) in ServiceNow to control access to records based on user roles and the Branch field value.

Purpose

To implement script-controlled Access Control Lists (ACLs) in ServiceNow so that access to records in the custom Institution Details table is controlled according to user roles and the Branch field value.

Objective

To understand record-level security in ServiceNow and configure separate READ, CREATE, WRITE, and DELETE ACLs.
