

## **8. Project Demonstration Phase**

### **Project Name**

Script-Controlled ACL – Restrict Record Access Based on Field Value

### **Purpose of the Project**

To control access to records in the Institution Details table according to user roles and the Branch field value.

### **Use / Benefits**

The project demonstrates record-level security by controlling READ, CREATE, WRITE and DELETE access according to configured roles and conditions.

### **Project Execution / Working Process**

- Demonstrate user creation.
- Demonstrate role creation.
- Demonstrate custom table creation.
- Demonstrate READ, CREATE, WRITE and DELETE ACL configuration.
- Demonstrate verification of the configured access.

### **Final Output**

The configured ACLs control access to the records according to the assigned roles and conditions.
